Resistors For Motorcycle

TYPE:

MTR-a Power:5w,20w,30w

MTR-b Power:5w/20w, 5w/30w,20w/20w ,30w/30w

MTR-c Power 25w

Features:

- High strength case
- Good ability of shock proof
- Two different power resistors assembled as a part

Applications:

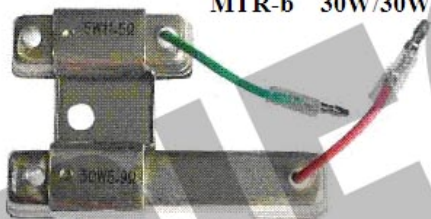

- Big size lamps of motorcycle
- Release circuit

MTR-b 5W/20W

MTR-b 5W/30W

MTR-b 20W/20W

MTR-b 30W/30W

MTR-a 5W

MTR-a 20W

MTR-a 30W

MTR-c 25W 6.8R 5%

If you've replaced the regular indicator or tail light bulbs on your motorcycle with brighter LED ones, you may find the new bulbs are either flashing too quickly or are blowing

MTR-c

- Correct too-fast flashing
- Stop bulbs blowing

The power and tolerance can be especially customized for customers
